

CHRISTOPHER STARKE

Software Engineer

(732) 770-5277 | cjstarke1@gmail.com | github.com/cjstarke

PROFILE

I am a **full stack developer** with 7 years of experience building production web applications. My focus on digital marketing informs how I approach user experience and creative problem solving. I bring curiosity, care, and a collaborative attitude to every role.

WORK EXPERIENCE

Converge
Marketing
2021 - 2026

Senior UI/UX Engineer 2023-2026 | Web Developer 2021 - 2023

A full service marketing agency:

- Led development of multiple production **Next.js / React / TypeScript** web applications built for clients across a wide range of industries, collectively generating over 1 million leads.
- Built multi-step lead capture forms that connect to a proprietary **REST API**, handling a full range of success and error states based on the API response.
- Wrote **Playwright** end-to-end test suites for each application, covering full form submission flows and a variety of error and edge-case scenarios.
- Implemented **GSAP** (GreenSock) ScrollTrigger animations, **Three.js** 3D visual effects, and **Lottie** interactive animations to deliver visually dynamic UI experiences across marketing-focused pages.
- Managed **AWS** infrastructure for a large portfolio of client domains via the AWS Console and CDK, overseeing deployment and hosting configurations across preview, staging, and production environments.
- Contributed to a **Spring Boot / Java** REST API backed by **MariaDB**, providing RESTful data access for campaign, client, partner, and lead management.
- Maintained a shared **Strapi CMS** deployed on AWS, managing content types and reusable component schemas across all client brands, and writing all frontend **GraphQL** queries.
- Leveraged an **AI agent** orchestration framework to coordinate multiple coding agents in parallel, increasing development output and streamlining QA testing cycles.

Digital
Pomegranate
2020 - 2021

Software Developer

Trivial Rush is a trivia app and website:

- Developed entire 15+ page website utilizing **Javascript, CSS, HTML** and **Node.js**.
- Handled HTTP GET and POST requests for fielding user queries, and GraphQL Subscription POST requests for updating daily prize information.
- Included embedded videos, a constantly updating countdown clock, meta tags and Sitemap for SEO, and an image CDN. Site receives an "A" Performance Score.

Fan Powered
Music
2014-2020

UI/UX developer 2017-2020 | Marketing Coordinator 2014-2017

A music streaming and gaming startup platform:

- Designed wireframes for website and mobile application.
- Created and coordinated marketing campaigns for artists and record labels with video and print ads, as well as social media marketing campaigns for Facebook and Instagram.
